# Next-ICRF Effort: Data Storage (1)

- **IVS Data Center**
  - upload to any primary data center (DC): CDDIS, OPAR, BKG
  - upload to ***ivsincoming*** of DC via **named ftp**
  - naming convention and data structure info required at start, to be decided beforehand
  - each upload to be preceded by update of analysis codes files at Coordinating Center
  - download from DC via **anonymous ftp**

# Next-ICRF Effort: Data Storage (2)

- **IVS Misc Area**
  - data exchange using one central data location
  - upload to ***ivsmisc*** on ivscc via **named ftp**
  - no filename and data structure conventions required; housekeeping is user/leader task
  - names, structure can be modified on the fly
  - download from ***ivsmisc*** via **named ftp** (same as for upload)
  - password required
